

Proposal to Establish a Coding Club at Ndejje Senior Secondary School

Introduction

Nova Gen is excited to present this proposal to establish a coding club at Ndejje Senior Secondary School aimed at empowering students with essential coding skills and preparing them for a digital future. Our commitment is to foster technological literacy and innovation among young learners, significantly benefiting your students.

Why Nova Gen?

- Expertise

Nova Gen has a team of skilled professionals with extensive experience in coding and software development.

- Passion

We are passionate about technology education and empowering the next generation.

- Commitment

Our goal is to provide high-quality, engaging and interactive learning experiences.

- Mentorship

Nova Gen's team of experienced professionals will guide, support and mentor students in understanding the dynamics of the digital world.

Objectives

- Provide students with a strong foundation in coding and computational thinking through structured and engaging instruction.
- Develop critical thinking, problem-solving, and analytical skills essential for academic and real-world success.
- Cultivate creativity and innovation by enabling students to design and build technology-driven solutions.
- Prepare and position students for active participation in national and international coding competitions and innovation platforms.
- Equip learners with in-demand, future-ready digital skills that align with global technological advancements.

Benefits of the Coding Club

Benefits to Students

- **Skill Development:** Students gain practical coding and digital skills that are relevant in today's technology-driven world.
- **Enhanced Academic Performance:** Improves logical thinking, problem-solving, and analytical abilities that support performance across subjects.
- **Career Exposure:** Introduces students to career paths in technology, software engineering, and innovation-driven industries.
- **Confidence Building:** Encourages creativity, self-expression, and confidence through project-based learning.
- **Portfolio Creation:** Enables students to build real projects they can showcase for future academic and career opportunities.
- **Certification:** Students receive recognized certificates at each stage, validating their skills and achievements.

Benefits to the School

- **Enhanced School Profile:** Positions the school as forward-thinking and committed to digital education and innovation.
- **Competitive Advantage:** Attracts prospective students and parents interested in modern, technology-focused education.
- **Academic Enrichment:** Complements the existing curriculum by integrating practical, real-world digital skills.
- **Participation in Competitions:** Opens opportunities for the school to participate in national and international coding competitions and tech events.
- **Capacity Building:** Builds a culture of innovation and technology within the school community.
- **Partnership Growth:** Establishes a strong partnership with Nova Gen, bringing continuous learning opportunities and exposure.

Timetable Integration

To ensure effective execution and maximum impact on the students, we recommend that the coding club be formally incorporated into the school timetable. This will allow registered students to have a structured and consistent time allocated for coding sessions, improving attendance, engagement, and learning outcomes. By embedding the program within the school schedule, students can clearly recognize it as an essential part of their academic development rather than an optional activity.

To successfully implement this, we propose the following:

- Allocation of at least **one hour to one and a half hours per session** within the school timetable to allow for meaningful learning and hands-on practice.
- Appointment of **student club representatives for each participating class** (e.g., S.1, S.2, S.3, and S.5), since candidate classes are not included, to help with coordination, communication, and mobilization of students.
- Designation of a **school liaison teacher or coordinator** to work closely with Nova Gen in planning schedules, monitoring progress, and ensuring smooth program delivery.
- Provision of **access to a computer lab or suitable learning space** during scheduled sessions to support practical learning.
- Commitment to **consistent attendance and timekeeping** by registered students to maintain continuity and achieve the desired learning outcomes.

Terms of engagement

- Training

Nova Gen will provide qualified trainers to conduct coding sessions at the school.

- Resources

The school will provide a conducive learning environment where the training will take place. Nova Gen will supply all necessary software learning materials.

- Student participation

The school will facilitate student enrollment and ensure regular attendance.

- Parental involvement

Parents will be encouraged to attend the hackathons to support and celebrate their children's progress.

- Evaluation

Students will be assessed periodically to track their progress and provide feedback.

What the students will learn

Beginner Level

- **HTML:** Understanding how to structure and build web pages
- **CSS:** Designing and styling visually appealing websites
- **JavaScript:** Adding interactivity and dynamic functionality
- No prior experience required – ideal for beginners
- Engaging, hands-on learning through games, mini-projects, and creative activities

Advanced Level

- Mastery of **industry-standard technologies** (HTML, CSS, JavaScript)
- **Portfolio Development:** Creating real-world projects that showcase each student's skills and progress
- **Career Preparation:** Building competencies valued by universities and employers
- **Real-World Applications:** Developing web applications that solve practical, real-life problems
- **Mentorship:** Learning directly from experienced developers and industry professionals
- Opportunity to progress into **advanced technologies and modern frameworks** (such as React, Node.js, and other industry tools) for students who continue with the program
- For students who wish to further advance, we also introduce additional programming languages such as **Python**, opening pathways into areas like automation, data science, and software development

Structured Curriculum

Nova Gen delivers a well-structured and carefully designed curriculum that ensures progressive learning from beginner to advanced levels. The curriculum is aligned with industry standards and focuses on both theoretical understanding and practical application, enabling students to build real-world skills over time.

***N.B.** A breakdown of our three-year curriculum will be shared upon approval of this proposal.*

Certification

At the end of each learning phase, students will be awarded certified certificates recognizing their skills and achievements. These certificates serve as a valuable addition to their academic and professional portfolios

Payment/Club Fees

Each student will be required to pay a fee of **UGX 200,000 per student per term**.

- Payments will be made through our convenient channels, including **MTN Mobile Money, Airtel Money, bank transfer, and cash payments**.
- All payments will be properly recorded to ensure transparency and accountability.
- Upon payment, **official receipts will be issued to parents/guardians** as proof of payment for record-keeping purposes.
- The fee covers training sessions, learning materials, mentorship, and certification support throughout the term.
- Clear communication will be maintained with parents regarding payment processes, schedules, and student progress updates.

Conclusion

We believe that this coding club will provide a unique and valuable opportunity for your students, enhancing their educational experience and opening doors to future opportunities in technology.

Thank you for considering this proposal. We look forward to the possibility of partnering with Ndejje Senior Secondary School to bring this exciting initiative to life. Please feel free to contact us with any questions or to discuss this proposal further.

Sincerely,

Nabilah Kitiibwa
